

One-Pass Epoxy Flooring

UniKrom 60

Floor Components

All Purpose Solid-Color Flooring System

Formulated specifically for institutional, commercial and industrial usage, PalmaLite UniKrom 60 (1/16") is Palma's low-cost general purpose self-sealing epoxy flooring system. UniKrom 60 surface comes in 8 designer colors to match almost any architectural motif. Encompassing a wide range of environments from light industrial to aggressive heavy industrial, it is an ideal floor for areas such as pharmaceutical labs, offices, prisons, manufacturing, food and chemical processing, sales areas and classrooms.

Certified Waterproof by Independent Laboratory

All PalmaLite epoxy flooring systems are certified to be waterproof which eliminates the need for a waterproof membrane. This results in a cost saving of 20 to 30 percent over competitive products that recommend membranes for waterproofing.

Low Cost, Efficient

A new UniKrom 60 floor provides years of dependable service. Providing a tough mechanical and chemical bond, laboratory tests show UniKrom 60's physical and chemical composition resists physical impact, abrasion, organic and inorganic acids, while outlasting concrete 3 to 1. The surface is slip-resistant, meeting all ASTM requirements.

No Seams to Trap Dirt or Bacteria

UniKrom 60 cleans up easily. Its uniform, non porous surface is seam free. The UniKrom 60 epoxy flooring system will not support bacterial and fungal growth. It has been accepted by New York State and New York City Department of Buildings MEA Division for smoke and flame spread (MEA # 176-96-M).
